

INTEGRATION PERFORMANCE

IP-UNI82

The IP-UNI82 is a compact, powerful 2-way universal component system that delivers Morel's renowned natural sound, dynamics, and articulation.

It features a pair of ultra-slim 8-inch (200mm) woofers that enhance your audio system's performance without requiring major modifications.

Morel Integration Performance systems prioritize easy installation, and our engineers design each system with that in mind. The IP-UNI82 woofers feature our innovative inverted neodymium magnet motor that allows us to design a proprietary chassis with a compact form factor with minimal mounting depth, so the IP-UNI82 can fit where other 8-inch woofers won't.

The superb 1-inch (25mm) compact soft dome tweeters are easy to fit in most factory locations. Protected by an easy-to-install inline crossover, they deliver incredible clarity and detail in the high-frequency range and integrate smoothly with a dynamic, bass-rich 8" (200mm) woofer to form an accurate soundstage and image. The IP-UNI82 offers best-in-class performance, and we're confident you'll agree after one listen.

Key advantages

- Shallow profile for easy fitment
- Excellent Bass response
- In-line crossover for easy installation
- 1" (25mm) soft dome tweeter with excellent off axis response
- Inverted powerful Neo magnet design
- High Efficiency for optimal OE installation (92dB)
- High power handling over 100Wrms
- Aluminum die-cast basket for better bass performance and less vibration.

Specifications

Configuration	2-Way
Woofer Size	8.26" (210mm)
Tweeter	1" (25 mm)
Nominal Impedance (ohm)	4
Nom. Power Handling (Wrms)	100
Max Power Handling (W)	300
Sensitivity (2.83 V/1M) dB	92
Frequency Response (Hz)	40-20,000
